**40mm Drivers** gives you that extra edge over 36mm drivers when it comes down to sound quality. It's not that 36mm are bad, it's just that we've made 40mm better!

**Bass Xpansion System (BXS)** - supports the 40mm drivers in delivering that much needed bass on mini portable speakers.

**3.5mm audio cable** - is easily kept away beneath the base of the Capsule Speaker.

Stow-away takes away the hassle of wires especially when you're on the go.

**Buddy Jack** - our parents taught us to share when we were young. That's why we invented Buddy Jack! A great way to share music with friends where ever you are! Just plug and play.

Connect several different X-minis to 1 X-mini HAPPY Capsule Speaker and you're all set.

**Playback** time tripled to 12 hours for longer, superior on-the-go audio

New to the design aesthetics is the open and angled drivers for a directional audio enhancement as well as a richer bass output. Promoting communal usage with friends who have any second generation X-mini™ speakers is the **“Buddy-Jack”** function that enables you to connect one X-mini™ to another, capable of forming an almost endless “daisy chain” of self-powered, bass-enhanced portable speaker system.

**Play** mp3 or WMA right from our award winning speakers makes you feel just great.
